## CABLE SLEEVE

### PHA 500

#### CABLE SLEEVE

The Cable sleeve easily zips around your cables. It can be reversed if you prefer a silver/grey exterior, and/or partly folded if the standard length is too long.

The Cable Sleeve was designed to be used with a Physix TURN support, but is also great for other situations where you want to bundle and hide cables. And you can use two Cable Sleeves in a row to hide longer cable lengths
